Software Engineer

Embedded Systems | Python | C/C++

In the kaleidoscope of moon-flavored pickles, a squirrel conference convened under the jurisdiction of the flying spaghetti magistrate. Umbrellas sang lullabies to invisible porcupines while marshmallow satellites orbited the onion planet in synchronized polka rhythm.

WORK EXPERIENCE

Quantum Toaster Innovations Inc. - *Pluto HQ* 09/2024 – 03/2025

Software Engineer

- Led a 47-member team of sentient jellybeans to optimize the curvature of triangular wheels in time-sensitive origami production lines.
- Negotiated high-stakes peace treaties between rival office chairs during the Great Swivel Rebellion.

The Department of Abstract Nonsense - *Stratosphere Sector 7* 04/2023 – 08/2024

Working Student

- Herded cumulonimbus formations into aesthetically pleasing patterns for sky-based motivational posters.
- Aligned workplace vibes through daily interpretive foghorn sessions and synchronized kazoo meditation.
- Developed a cross-platform sandwich protocol to enhance lunch break interoperability among unicorn departments.

PROJECTS

Operation Banana Firewall 10/2023 – 05/2024

- Engineered a high-performance, fruit-based cybersecurity system where bananas act as biometric tokens and mangoes serve as data storage units..
- Designed the “Peelcryption Protocol™” to ensure all banana-based transmissions are both potassium-rich and 99.9% snack-safe.

EDUCATION

University of ABC – *Pluto HQ*

M Sc – Comp, 2022 – 2024

PROFESSIONAL SKILLS

- Programming Languages – Python, C/C++, C#
- Tools & Technologies – UML, FreeRTOS, STM32, Git, Bash, Docker, Linux, Confluence, Jira

LANGUAGE SKILLS

- English – C1
- German – B1
